

Antimicrobial Stewardship TeleECHO™ Initiative

You are invited to participate in South Carolina's free telehealth initiative which aims to improve antimicrobial use in ambulatory care settings across our state.

Free CME and CPE available

What is Project ECHO?

Project ECHO™ (Extension for Community Healthcare Outcomes) uses telehealth to transform the way education and knowledge are delivered. The ECHO™ model is a tele-mentoring, guided practice model that focuses on moving knowledge and not people. It is a worldwide movement that currently addresses over 65 different topics including Hepatitis C, chronic pain, HIV, and antibiotic stewardship.

ASC-SC Antimicrobial Stewardship TeleECHO

We aim to improve the productivity of antimicrobial stewardship programs (ASPs) across South Carolina through the Project ECHO™ tele-mentoring model.

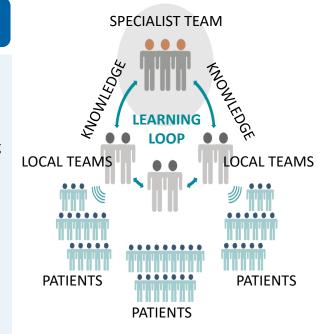

Our Goals

- Engage with healthcare providers in ambulatory care settings
- 2. Apply **case-based learning** to master complex patient and system challenges
- 3. Empower participants with **tools and resources** to improve local antimicrobial use

Benefits of Participation

- Share experiences in the form of case-based discussions on specific issues related to antimicrobial use
- Receive specific feedback from panel of experts
- Enhance your antimicrobial stewardship skills
- Create a **network** of colleagues actively engaged in stewardship in the ambulatory setting
- Enhance your understanding of Joint Commission requirements
- Earn free CME and CPE credit

This activity is eligible for ACPE credit; see final CPE activity announcement for specific details

Session Information

- Participation is free
- Sessions will be broadcast via Zoom© video-conferencing (access to be provided)
- Sessions will be held on the 2nd
 Thursday of the month from 12-1pm beginning April 9, 2020
- Regular attendance is strongly encouraged
- Format: 15-20 min presentation, followed by case-based discussion and O&A
- Target Audience: physicians, physician assistants, nurse practitioners, nurses, and pharmacists
